

agostino di scipio materials available upon request (updated May 2016)

works are listed by title in alphabetic order

available items are indicated with a tick

the term “live electronics” is used throughout as a shortcut for a variety of electroacoustic equipment configurations; each work has its technical set-up, as described in the score instructions or other technical documentation available from the composer

digital signal processing methods particular to each work are illustrated in the score instructions or other technical documentation, and can be implemented on fully programmable signal processing software; the composer's own implementations are available for items marked either * (KYMA) or ** (PURE DATA)
